

Marcos Bernasconi

Front End Developer

Email: xb3rna@gmail.com

Portfolio Website: <https://marcos-bernasconi.github.io/>

Front End developer capable of designing and developing websites and web applications that are performant and responsive.

In addition to having an in-depth knowledge of the main technologies for Front end development (**Html, Css, Javascript**), I have experiences with new methodologies, libraries and JavaScript Framework.

I always take the opportunity to learn and apply the best practices. Some of my projects are present in my portfolio website; I usually use **React.js** for the UI and **TailwindCss** or **Scss** for the style. Furthermore, I am very flexible and quickly learn new technologies.

- Able of creating complex user interfaces
- Good understanding of the fundamental values of web design
- Turn every design into code without any problems
- Collaborative and humble attitude
- Improving and always learning

To get an idea of the websites I develop I highly recommend visiting my portfolio site. Additionally, it is simple to get in touch with me by email.
